Patent No. 5766840

GENERAL INFORMATION:

APPLICANT: Kim, Jungauh P.

APPLICANT: Young, LaVonne M.

APPLICANT: Young, LaVonne M.

APPLICANT: Linnen, Jeffrey M.

TITLE OF INVENTION: Hepatitis G Virus and Molecular

TITLE OF INVENTION: Cloning Thereof

NUMBER OF SEQUENCES: 277

CORRESPONDENCE ADDRESS:

ADDRESSEE: Dehlinger & Associates
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ZIP: 94306

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          RESULT 353
US-09-071-845-1707/c

| Sequence 1707, Application US/09071845
| Patent No. 6132967
| GENERAL INFORMATION:
| APPLICANT: Susan Grimm
| APPLICANT: Susan Grimm
| APPLICANT: Sean Sullivan
| APPLICANT: Sean Sullivan
| APPLICANT: Sean Sullivan
| TILE OF INVENTION: RIBOZYME TREATMENT OF
| TITLE OF INVENTION: BIBOZYME TREATMENT OF
| TITLE OF INVENTION: BIBAZES OR CONDITIONS
| TITLE OF INVENTION: MOLECULULAR ADHESION
| TITLE OF SEQUENCES: 2390
     RELATED TO LEVELS OF INTRACELLULAR ADHESION MOLECULE-1 (I-CAM-1): 2390
                                                                                                                                                                                                                                                                                                   COMPUTER READABLE FORM:
MEDIUM TYPE: Storage
COMPUTER: IBM Compatible
COMPUTER: IBM Compatible
COMPUTER: IBM Compatible
OPERATING SYSTEM: IBM P.C. DOS 5.0
SOFTWARE: Word Perfect 5.1
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/09/071,845
FILING DATE:
CLASSIFICATION NUMBER: US/08/292,620
FILING DATE: August 17, 1994
APPLICATION NUMBER: 08/08,895
FILING DATE: January 19, 1993
APPLICATION NUMBER: 07/989,649
FILING DATE: December 7, 1992
ATTORNEY/AGENT INFORMATION:
NAME: Warburg, Richard J.
REGISTRATION NUMBER: 32,327
REFERENCE/DOCKET NUMBER: 208/149
TITLE OF INVENTION: RELATED TO LET TITLE OF INVENTION: INTRACELLULAR TITLE OF INVENTION: INTRACELLULAR NUMBER OF SEQUENCES: 2390.

GENERAL INFORMATION:

APPLICANT: Ravoo, Pam

APPLICANT: Ravoo, Pam

APPLICANT: Barobedon, Jam

APPLICANT: Escobedon, Jam

CURRENT APPLICANTION: Method and Reagent for the Treatment of Diseases or Conditions of TITLE OF INVENTION: Lavels of Vascular Endothelial Growth Factor Receptor

FILE REFERENCE: MBHB00,876-31(237,198)

CURRENT APPLICATION NUMBER: US 60/005,974

PRIOR PILING DATE: 1996-10-26

PRIOR PILING DATE: 1996-10-8

NUMBER OF SEQ ID NOS: 14225

SOFTWARE: PatentIn version 3.0

SEQ ID NO 3069

LENGTH: 17

SERVERAL INFORMATION:

APPLICANT: Rabozyme Pharmaceuticals, Inc.

APPLICANT: Baveco, Pau

APPLICANT: Stinchcomb, Dan

APPLICANT: Stinchcomb, Dan

APPLICANT: Stochcomb, Dan

APPLICANT: Stinchcomb, Dan

APPLICANTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF INVENTION NUMBER: US/09/371,772B

CURRENT APPLICATION NUMBER: US 60/005,974

PRIOR FILING DATE: 1995-08-10

PRIOR APPLICATION NUMBER: US 60/005,974

PRIOR FILING DATE: 1995-01-08

NUMBER OF SEQ ID NOS: 14225

SEQ ID NOS: 14225

SEQ ID NO 4643
